

## Market-wide Half-Hourly Settlement (MHHS) Programme 101 Guide: All Participants

### Programme summary

Market-wide Half-Hourly Settlement (MHHS) reform will see the electricity industry working together in a significant move forward in how electricity is used and accounted for. The outcome of MHHS will be a faster, more accurate settlement process for all market participants, introducing site specific reconciliation using Half-Hourly (HH) meter readings. This will provide suppliers with accurate information about the cost of serving their customers each day. The **four-year Programme plan** shows a detailed overview of the Programme timelines and key events for your diary.

MHHS will provide suppliers with powerful incentives to offer new tariffs and products to their customers that match their consumption. The MHHS Programme will contribute to a more cost-effective electricity system, encouraging more flexible use of energy and helping consumers to lower their bills. Additionally, the data generated by MHHS will enable the industry to make the most efficient use of existing infrastructure, reducing the need for extra spending on future generation and network assets.

MHHS is a key enabler of the flexibility needed to support the nation’s transition to Net Zero. All market participants have a part to play in ensuring a successful outcome for the Programme.
